

Maureen Kelly is the manager of the Data Quality department at the Canadian Institute for Health Information (CIHI). She leads the corporate program to continuously improve data and information quality within CIHI and the broader health sector. Prior to her role in Data Quality, Maureen managed the operations of CIHI's Home and Continuing Care program, overseeing the submission, analysis and reporting of pan-Canadian data from these sectors. Before joining CIHI in 2003, Maureen was a social researcher with the Office for National Statistics in the UK and Statistics Canada, primarily working on large-scale health and social surveys. Maureen has a Bachelor of Arts (Honours) in Social and Political Sciences from Cambridge University and a postgraduate certificate in Applied Statistics.
